

This diagram shows the decibel level of the train's horn as it passes through Tipton City.

The 90+ decibel area extends a block from the tracks in each direction - from 4th Street to 6th Street at Main Street, including over 150 homes.

The 80+ decibel area extends from the Fire Department on Main Street to First Street - all homes and businesses in Tipton City between the tracks and the levee/bike path are effectively in this area, as well as nearly 1,000 homes west of the tracks.

The 70+ decibel area extends from Liberty Commons and the old water tower in the west to the Shelter at Kyle park in the east.
